STW300CEM 3ʳᵈ Assignment
Deadline : 5th May 2019 5:00PM
Title : Online clothing shopping app

There should be at least 5 Activities

1. **Login and registration Activity** (Use SharedPreferences for storing and retrieving data and for designing use Fragments for login and registration and display these fragments using TabLayout and ViewPager).
2. **Add item Activity** (Item properties are itemName, itemPrice, itemImageName,itemDescription. **Do not** add image in the external or internal storage. Put all the images in **res/drawable** folder).
3. **Dashboard Activity** (Display all the items from **items.txt** files using Recyclerview's gridlayout).
4. **Description Activity** (After clicking an item's image in the Dashboard, display all the details of an item in this activity).

Note :

- UI design is up to you.
- All the item details should be saved in **items.txt** file (Internal or External storage).
- Save at least 10 items.
- For Linux user use **kazam** for screencast and **ActivePresenter** for Windows and Mac. Upload the video in YouTube as **unlisted category** and share the video link to moodle and **Readme.md** file in github.
- Video should be 7 to 8 minutes long explaining your app.

Share your project in the given link below :

Check your group name properly and share the project in the given link.

Sample txt File

items.txt file

itemname → itemPrice → itemImageName → itemDescription

shirt → 2000 → myshirt → Full Sleeve shirt
t-shirt → 1500 → tshirt → Half sleeve
